

In the Claims

Pursuant to Examiner's claims rejections under 35 U.S.C. 112, 102(b) and 103(a), Applicant hereby submits new claims, including a complete listing of all claims in the application with the status of each claim in parentheses.

Claims 1-5 (canceled)

6. (new) An audio signal cable comprising:

a signal multiple core conduit and a return multiple core conduit, the diameter of said signal conduit and said return conduit being equal;

said signal and said return multiple core conduits each containing individually insulated larger solid conductors, individually insulated smaller solid conductors, and individually insulated tinsel wires of distinct sizes;

insulation formed around said multiple core conduit;

filler elements disposed laterally along said multiple core conduit;

insulation formed around said filler elements; and

wherein

each of said individually insulated larger solid conductors, said smaller solid conductors and said tinsel wires is capable of conducting an electrical signal.

7. (new) An audio signal cable of Claim 1, wherein said larger solid conductors and said smaller solid conductors are cross-sectionally circular.

5

8. (new) An audio signal cable of Claim 1, wherein said larger solid conductors and said smaller solid conductors are cross-sectionally flat.

10 9. (new) An audio signal cable of Claim 2 and 3, wherein said larger solid conductors and said smaller solid conductors are of distinct diameters and, furthermore, disposed in unequal quantities within said audio signal cable.

15 10. (new) An audio signal cable of Claim 4, wherein the diameter of said larger solid conductors is two to three times larger than the diameter of said smaller solid conductors.
